Hope,

We are still working on the completion of an efficacy report for Mycoshield on citrus. I was just informed that it will most likely be completed tomorrow. I will submit the report on Monday at the latest and will send you a courtesy copy by email. Let me know if this is a problem.

Best Regards,

Danielle

A CD of references is probably best as paper could result in a big package!

I believe you should be able to submit the efficacy through the portal as a resubmission to the petition.

Regarding the resistance management plan and draft labels- you could submit that through the portal at the same time as the efficacy.

When you submit, courtesy email copies to me would be helpful (minus the references- I doubt they would fit in one email).

Hello Hope,

I have a few questions regarding the best way to submit the information requested in the letters of April 6:

Do you prefer that we submit paper copies of all references/public literature cited in the Section 152 assessments for citrus and cherry? Or can we send you for each assessment a separate CD that contains all references/citations?

For the efficacy data, we can submit a report that will be assigned an MRID #. Can this be submitted through CDX if I reference the petition number?

For the resistance management information/plan and possibly draft labels incorporating updated resistance management language, can electronic copies be sent to you by email or should paper copies be formally submitted?

Let me know if you have other suggestions.

Best Regards,

Danielle

Good morning,

At the antibiotic meeting we had on 3/27/2017, we spoke to you regarding the evolving policy on antibiotic new use applications, and identified certain information that we believe will help us move forward with these types of applications. Attached please find

letters for each of your pending petitions further explaining these items. If you have any questions, please contact me at the number below.
